

Ali Rezazadeh

📍 Tehran, Iran ✉ alirezazadeh129@gmail.com ☎ +98 916 755 25 56 in Ali Rezazadeh

Profile Summary

AI Engineer with more than four years of experience building and deploying LLM-based and agentic systems in production, from early NLP research to leading an AI engineering team. Experienced across the full product lifecycle – development, evaluation, deployment, and monitoring – with work spanning search, multi-agent orchestration, and voice AI, as well as secure on-premise LLM deployments for enterprise environments. Background in electrical engineering and published research in deep learning underpins a methodical, evaluation-driven approach to building reliable AI systems.

Education

MSc	Iran University of Science and Technology , Electrical Engineering	2022 – 2025
	- Branch: Digital Electronic Systems - GPA: 4.00/4.00 - Thesis: Sentiment Analysis for Social Network Messages Based on Deep Neural Networks and Large Language Models	Tehran, Iran
BSc	Shahid Chamran University of Ahvaz , Electrical Engineering	2018 – 2022
	- Branch: Electronics - GPA: 3.47/4.00 - Last Two Years GPA: 3:60/4.00	Ahvaz, Iran

Research & Publications

LEMD-GARF: Lightweight Edge-based Malware Detection Using Genetic Algorithm Feature Selection and Random Forest Classification	Jul 2026
Ali Rezazadeh , Majid Nezarat, Ali Kalate, Hadi Shahriar Shahhoseini, Amin Rezaei ISVLSI 2026(IEEE)	
Enhanced Hate Speech Detection Using Focal Loss and Multi-Head Attention for Imbalanced Social Media Text	Aug 2025
Ali Rezazadeh , Hadi Shahriar Shahhoseini ICCKE 2025(IEEE) 🔗	
Acoustic Fault Diagnosis of Rolling Bearings in Induction Motors Using Time-Frequency Image Analysis	June 2024
Erfan Madadi Mahani, Ahmad Mirabadi, Ali Rezazadeh , Amir Hossein Karamali ICEMD 2024, IEEE 🔗	
Functional Architecture for E-Health Based on Internet of Things	Aug 2023
AmirHossein Jafari Pozveh, Ali Rezazadeh , Hadi Shahriar Shahhoseini ITU SG-20 🔗	

Manuscripts in Preparation

1. **NeuSym: Neural-Symbolic Reasoning with Implicit-Aware Enhancement for Aspect-Based Sentiment Analysis**
Ali Rezazadeh, Hadi Shahriar Shahhoseini

Work Experience

MTN Irancell, Senior AI Engineer

Tehran, Iran (Hybrid)
Feb 2026 – Present

- Deployed and maintained multiple secure, on-premise AI solutions for a large-scale, security-first telecom company
- **Local LLM Inference Engine:** Deployed and maintained an on-premise LLM inference engine to serve internal AI applications without reliance on external APIs
- **Local Chat UI:** Deployed an internal chat interface providing company-wide access to the local LLM system
- **Local Monitoring System:** Deployed an on-premise monitoring stack for tracking LLM usage, performance, and reliability
- **Infrastructure SQL Agent:** Built and deployed an agent that translates natural language queries into SQL to help internal teams retrieve infrastructure information
- **Server Debugging Agent:** Developed and deployed an agent directly on production servers to assist the Unix/infrastructure team with diagnosing and debugging server issues

Findora, Lead AI Engineer / Team Lead

Remote, Canada
Oct 2023 – Jun 2026

- Led AI engineering team, overseeing project planning, technical architecture, and team coordination
- **Findora Search Engine:** Architected and developed an AI-powered search engine (findora.ai) utilizing advanced NLP and retrieval techniques
- **Formora Project:** Built an intelligent agent for automated form filling using Advanced Form Detection Neural Networks and LLMs
- **BLUR Project:** Developed a voice-activated AI assistant for visually impaired users, featuring real-time navigation guidance through voice commands and spatial awareness.

Other Projects

Medical Image Captioning Using Transformer and CLIP Model

Sept 2023

- Developed a multimodal system combining vision and language models for medical image analysis
- Implemented transformer architecture for generating descriptive text from medical imagery

Sentiment Analysis of Twitter Messages for Airline Quality Evaluation

Feb 2023

- Designed LSTM-CNN hybrid neural network for sentiment classification
- Analyzed social network data to evaluate airline service quality

Detection of Bone Fracture Points in X-Ray Images

Dec 2021

- Implemented computer vision algorithms for medical image analysis
- Developed deep learning model for automated fracture detection

Technical Skills

Programming Languages: Python, MATLAB, C, Verilog

ML/DL Frameworks: PyTorch, TensorFlow, Keras, Flask, Fast-API

NLP Tools: NLTK, spaCy, Hugging Face Transformers, Langchain, Llama Index, HayStack, LangFuse, MCP Servers, Qdrant, MILVUS, Faiss

Agentic Frameworks: LangGraph, Openai SDK, Google ADK, Crew AI

Specializations: Text and voice Agents, Large Language Models, Prompt Engineering, Deployment and utilization of MCP servers (Model Context Protocol), Retrieval Augmented Generation (RAG), Sentiment Analysis, Image Processing, Multimodal Models

Tools & Technologies: Git, Docker, LaTeX, PostgreSQL, Redis, Microsoft Office

Certificates

Introduction to TensorFlow for AI, Machine Learning, and Deep Learning

March 2023

- [Verification Link](#) 

Supervised Machine Learning: Regression and Classification

Oct 2022

- [Verification Link](#) 

Deep Learning

July 2023

- Neuromatch Academy

Languages

1. **English** (Professional Working Proficiency)
2. **Persian** (Native Language)
3. **Arabic** (Elementary Proficiency)
